EXPERIENCE

Crew Member, McDonald's Restaurants   July 2021 - Present

- Collaborated in a group of 3 to 5 people in providing services to incoming customers
- Took on multiple roles and frequently multi tasked to provide the quickest food services possible

Java Instructor, Western Polaris Tutoring   Sept 2019 - Present

- Taught basic **Java** concepts and syntax to grade 4-8 students
- Explained and gave demonstrations on basic **data structures** such as stacks and queues and **algorithms** such as bubble sort and binary search.

Hack the 6ix Hackathon   August 2021

- Developed a weather application, **Smart Day**, in 36 hours
- Used the **ReactJS** framework and the **OpenWeatherMap API** to give weather updates and clothing recommendations to users. Project available at: `https://p-han-tom.github.io/hack6-weather-app/`

EDUCATION

London Central S.S,   Sept 2017 - June 2021
G.P.A. 90%
Relevant courses: grade 11, 12 computer science

PROJECTS

Personal Portfolio

- Personal website that contains my coding experience, project source code, and project links
- Implemented using **HTML, Bootstrap 4, CSS, and JavaScript** and hosted on GitHub pages at `https://roseak-lin.github.io/`

Data Structure and Algorithm Visualizer

- Built a site that helps give a visualization of algorithms such as breadth first search and data structures such as stacks
- Implemented **ReactJS and JavaScript** at `https://roseak-lin.github.io/DS-and-Algorithm-Visualizer/`

SKILLS AND AWARDS

Programming: Java, C++, HTML5, CSS3, JavaScript, ReactJS, Bootstrap 4, jQuery, node.js
Infrastructure: Git, Android Studio, Eclipse, Visual Studio Code
Awards:

- Canadian Computing Competition Senior Certificate of Distinction, 2021
- Canadian Computing Competition Junior Certificate of Distinction, 2020
